

To address a lack of technical standards and expertise in the RE/EE sector, REEEP and NESP partnered together to create seven training curricula, from PV installations to energy efficiency building design. Then, both programs supported 12 training academies and research institutes to deploy the training and market it to relevant firms. These trainings should lead to increased quality of RE projects in Nigeria and increased competition in the marketplace.

Besides certificates issued by training academies, REEEP and NESP are establishing a national certification system. Rather than certifying individual training centers, which would be costly and require more resources, Nigeria will use an independent third party certification body to conduct examinations. It is imperative that this body be independent as it will reduce conflicts of interest and ensure high quality standards.

GIZ's NESP II program will manage and support the third party body as it comes online. Please contact Sharon Kaburuk at GIZ with any questions: Sharon.Kaburuk@outlook.com.

Training Courses on Offer

SPVI

BAS • CU • IEA
ISSCeRER • NAPTIN
NCEEC • NCERD
SERC • TVC

Solar PV Installation (SPVI) – become a solar PV installer in 20 days; for electricians with informal training; 160 hours

SPVIS

BAS • CU • IEA
ISSCeRER • NAPTIN
NCEEC • NCERD
SERC • TVC

Solar PV Installation Supervisor (SPVIS) – become a solar PV supervisor in 30 days; for electricians with formal training; 240 hours

MGD

BAS • CU • IEA
ISSCeRER • NAPTIN
NCEEC • NCERD
SERC • TVC

Mini Grid Design (MGD) – become a mini grid designer in 35 days; for electrical engineers; 280 hours

RHPCE

CRET • GTDI
IEA • NAPTIN
NCEEC • SERC

Rural Hydropower Civil Engineering (RHPCE) – become a micro-hydro civil expert in 15 days; for civil engineers; 120 hours

EEBD

NIA • NAPTIN

Energy Efficient Building Design (EEBD) – become a building energy efficiency designer in 15 days; for building design professionals; 120 hours

EM

BAS • CRET • CU
GTDI • ISSCeRER
NAPTIN • NCEEC
NCERD • SERC

Energy Management (EM) – become an energy manager in 20 days; for facilities managers; 160 hours

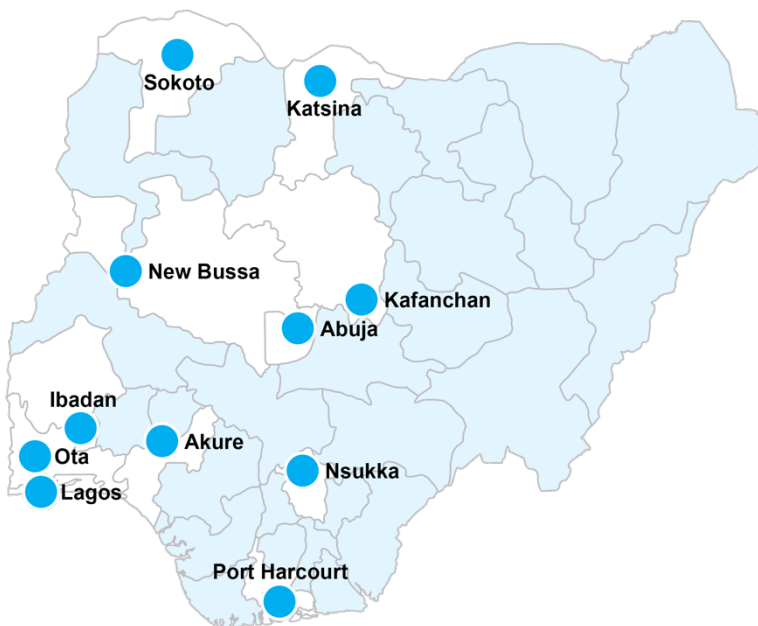

EA

BAS • CRET • CU
GTDI • ISSCeRER
NAPTIN • NCEEC
NCERD • SERC

Energy Audit (EA) – become an energy auditor in 25 days; for engineers; 200 hours
